

Ex : 9 Compliance Assessments: Test of Design and Test of Operational Effectiveness**Date: 03.08.2026****Aim:**

To perform a compliance assessment in Eramba by evaluating whether controls are appropriately designed (Test of Design) and whether they operate effectively in practice (Test of Operational Effectiveness).

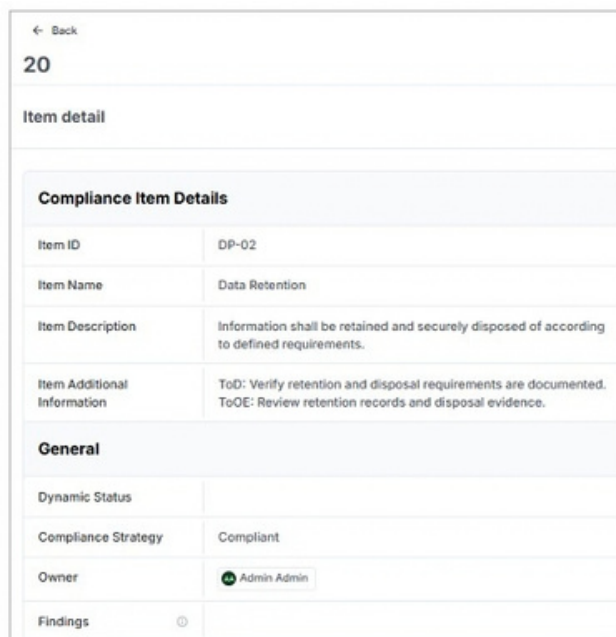

Procedure

- Log in to the Eramba application using the configured administrator credentials.
- Navigate to Compliance Management from the left-side menu.
- Select the appropriate Compliance Analysis/Assessment section and review the available compliance requirements.
- Select a compliance requirement or control that needs to be assessed.
- Perform the Test of Design (ToD) by checking whether the control is properly designed to address the identified compliance requirement or risk.
- Record the assessment result and supporting evidence for the Test of Design.
- Perform the Test of Operational Effectiveness (ToOE) by checking whether the control has been implemented and is operating effectively in practice.
- Record the operational assessment result, supporting evidence, observations, and any identified deficiencies.
- Review the overall compliance assessment results and identify controls that require improvement or corrective action.

Output:

The screenshot shows a web application interface for 'Compliance Analysis'. At the top right, there are notification and user profile icons. Below the header, there is a '+ Add Item' button. The main area contains a table with columns: 'Dynamic Status', 'Item ID', 'Item Name', 'Item Description', and 'Compliance Strategy'. The table lists several items, including 'Data Retention' (DP-02), 'Business Continuity Plan' (BC-01), 'Physical Access Control' (PS-01), 'Third-Party Security Clau...' (TP-02), 'Supplier Security Assess...' (TP-01), 'Incident Response Testing' (IM-03), 'Incident Reporting' (IM-02), 'Security Awareness Train...' (SA-01), and 'Backup Restoration Testing' (RR-02). Each item has a checkbox and a speech bubble icon in the 'Dynamic Status' column.

Dynamic Status	Item ID	Item Name	Item Description	Compliance Strategy
☐	DP-02	Data Retention	Information shall be retained and securely disposed of according to defined requirements.	Compliant
☐	BC-01	Business Continuity Plan...	Critical business process...	
☐	PS-01	Physical Access Control	Access to restricted area...	
☐	TP-02	Third-Party Security Clau...	Security requirements sh...	
☐	TP-01	Supplier Security Assess...	Relevant suppliers shall b...	
☐	IM-03	Incident Response Testing	Incident response proced...	
☐	IM-02	Incident Reporting	Security incidents shall b...	
☐	SA-01	Security Awareness Train...	Personnel shall receive s...	
☐	RR-02	Backup Restoration Testing	Backup restoration shall...	

The screenshot shows the 'Item detail' view for item DP-02. It includes a 'Back' button, the item number '20', and a section titled 'Compliance Item Details'. This section contains fields for 'Item ID', 'Item Name', 'Item Description', and 'Item Additional Information'. Below this is a 'General' section with fields for 'Dynamic Status', 'Compliance Strategy', 'Owner', and 'Findings'.

Compliance Item Details	
Item ID	DP-02
Item Name	Data Retention
Item Description	Information shall be retained and securely disposed of according to defined requirements.
Item Additional Information	ToD: Verify retention and disposal requirements are documented. ToOE: Review retention records and disposal evidence.
General	
Dynamic Status	
Compliance Strategy	Compliant
Owner	Admin Admin
Findings	

Result:

The Test of Design and Test of Operational Effectiveness were performed successfully in Eramba, and the compliance status and control deficiencies were identified for management review.
