

Ex:7**Establishing Metrics (KPIs and KRIs)****Date: 31.07.2026****Aim:**

To establish Key Performance Indicators (KPIs) and Key Risk Indicators (KRIs) in Eramba for monitoring organizational performance and risk levels.

Procedure:**1. Login to Eramba**

- o Open the Eramba dashboard at <https://localhost:8443>.
- o Enter your username and password.

2. Open Risk Management

- o From the left-side menu, select Risk Management.

3. Create a KPI

- o Go to the section related to Metrics/KPIs.
- o Select Add.
- o Enter the KPI details, for example:
 - Name: Security Control Compliance Rate
 - Description: Percentage of implemented security controls.
 - Target: 95%
 - Measurement: Monthly
- o Save the KPI.

4. Create a KRI

- o Select the option to create a Key Risk Indicator (KRI).
- o Enter details such as:
 - Name: Number of Security Incidents
 - Description: Number of security incidents detected during a month.
 - Threshold: 5 incidents
 - Frequency: Monthly
- o Save the KRI.

5. Monitor the Metrics

- o Review the KPI and KRI values periodically.
- o Compare actual values with their defined targets or thresholds.
- o Identify areas where performance is below the KPI target or risk exceeds the KRI threshold.

Example Metrics

Target/Threshold KPI $\geq 95\%$		
Employee Security Training Completion	KPI $\geq 90\%$	
Number of Security Incidents	KRI $\leq 5/\text{month}$	
Number of Critical Vulnerabilities	KRI ≤ 3	
Average Incident Response Time	KPI $\leq 4 \text{ hours}$	

Output:
